CSE (Data Science) Undergraduate | Software & Game Developer | Python & Unity

Career Objective

Computer Science (Data Science) undergraduate with strong hands-on experience in software and game development using Unity and C#. Interested in applying programming, logical thinking, and analytical skills while gradually building expertise in data science and analytics through real-world applications.

Work Experience

Web Development & AI-Based Projects

Self-Driven Projects | 2025–Present

- Developed a responsive language-learning website using HTML and CSS and python agent for image processing

Game Development (Unity Engine)

Self-Driven Projects | 2023–Present

- Designed and developed multiple 2D and 3D games using Unity and C#

Education

B.Tech in Computer Science and Engineering (Data Science) **2023 - Present**
Noida Institue of Engineering and Technology

Senior Secondary(12th) **2022 - 2023**
Noida Public School

Secondary(10th) **2020 - 2021**
Noida Public School

Projects

1. Mobile Game Projects - **LoopCars, Ski King, Just Divide, Pen Fight 3D**
   - Designed and implemented game loop architecture and state management systems
2. Personal Portfolio Website **(React, Git, GitHub Pages)**
   - Leveraged AI-assisted development tools to accelerate UI design, and front-end implementation
3. **AI-Based PDF Image Background Removal Tool (Python)**
   - Built a Python-based AI solution to remove image backgrounds from PDFs for document processing

Skills

Technical Skills

- **Programming:** C#, Python, Basic SQL, C++, HTML, CSS
- **Game Development:** Unity Engine, 2D/3D Gameplay Systems, Mobile Optimization
- **Data Analysis:** Python, Statistics, Data Cleaning, Data Visualization

Tools - Unity, VS Code, Git, Android Build Tools

Soft Skills - Problem - Solving || Team Collaboration || Self - Learning
